

## TAPE AND GLUE MOUNTED PLAQUES INSTALL PROCEDURE

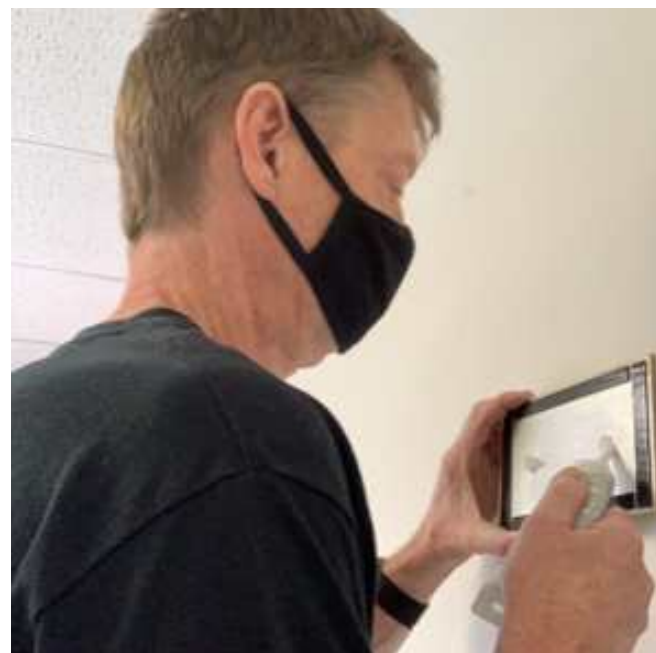

1

Take measurements of the wall, determining location for plaque.

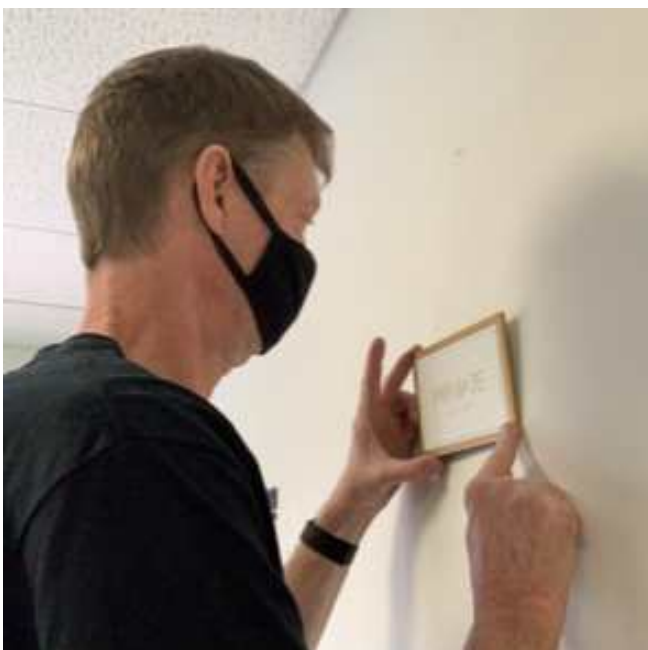

2

Peel the double-sided tape on the back of the plaque.

3

Apply at least one blob of glue (silicon or grip and grab), more for bigger plaques. Clean wall if necessary.

4

Tack one corner of plaque to wall, so that you can freely rotate in place. Level plaque and stick the rest to wall.
