

TAPE MOUNTED CUTOUTS INSTALL PROCEDURE

1

Take measurements of the wall, determining location for cutouts.

2

Tape template (vinyl or acrylic) to the wall (using the tape as a hinge if made of vinyl), ensuring it is level and in the correct spot. If the wall is painted, use tape that won't peel any paint.

3

Peel backing and squeegee to wall (for vinyl template only).

4

Peel pre-masking tape, leaving the vinyl template stuck to the wall (for vinyl template only).

TAPE MOUNTED CUTOUTS INSTALL PROCEDURE

5

Using the tape on the back of the cutouts, stick them to the wall, using the template as a reference.

6

Take the template off the wall.
