

## VINYL LETTERS / LOGOS INSTALL PROCEDURE

1

Take measurements of the wall, determining location for vinyl. If going on glass, clean it well, with a razor blade if necessary.

2

Tape the vinyl to the wall/glass, using tape as a hinge on the top. If it is going onto a painted surface, use a tape that won't peel any paint.

3

Check for level and correct location.

4

Peel backing and squeegee to surface. Squeegee horizontally from the centre out, working downward.

## VINYL LETTERS / LOGOS INSTALL PROCEDURE

5

Peel pre-masking tape upon itself at 180°, leaving vinyl stuck to surface.

6

If there is any residue left, clean it with glass cleaner or isopropyl alcohol.
